1. Optimization of Small Molecule Probes for the Nervous System

Release Date: 08-26-2009Open Date: 11-05-2009Due Date: 09-08-2012Close Date: 09-08-2012

The purpose of this funding opportunity is to facilitate the development of small molecule probes that will add a pharmacological dimension to basic neuroscience work, and enable proof-of-principle studies linking nervous system therapeutic targets, mechanisms or phenotypes to disease onset or progression. NIH has made a significant commitment to probe development via Institute-specific and Blue ...

3. Directed Stem Cell Differentiation for Cell-Based Therapies for Heart, Lung, and Blood Diseases

Release Date: 08-12-2009Open Date: 11-05-2009Due Date: 09-08-2012Close Date: 09-08-2012

The purpose of this Funding Opportunity Announcement (FOA) is to define the factors and mechanisms controlling the differentiation of embryonic or adult stem or progenitor cells, either in vitro or in vivo. The FOA is designed to stimulate new scientific advances in stem cell differentiation including technology research that may not be hypothesis driven. The long-range goal of this program is the ...

5. Innovations in Biomedical Computational Science and Technology Initiative

Release Date: 08-05-2009Open Date: 11-05-2009Due Date: 09-08-2012Close Date:
09-08-2012

This announcement covers broad-based research in biomedical informatics and computational biology, and is coordinated by the NIH Biomedical Information Science and Technology Initiative (BISTI) committee. Through this and related opportunities, Institutes and Centers of the NIH offer support for: fundamental research in biomedical informatics and computational biology; development of new computati ...

7. Advanced Tools and Technologies for Cerebrospinal Fluid Shunts STTR

Release Date: 06-08-2009Open Date: 07-05-2009Due Date: 05-08-2012Close Date:
05-08-2012

Hydrocephalus is caused by a heterogeneous group of diseases and disorders that can affect individuals of any age, from infants to the elderly. Cerebrospinal fluid (CSF) shunts have been successfully used to treat hydrocephalus for over 50 years and are the most common treatment option for this disorder. In a typical shunt system, a catheter is used to drain the fluid from the brain to a site in t ...

9. [Technology Development for the Detection and Evaluation of Chemical and Biological Carcinogens](#)

Release Date: 05-19-2009Open Date: 07-05-2009Due Date: 05-08-2012Close Date: 05-08-2012

Purpose This Funding Opportunity Announcement (FOA), issued by the National Cancer Institute (NCI), at the National Institutes of Health (NIH), invites Small Business Innovation Research (SBIR) grant applications from small business concerns (SBCs) propose to develop new technologies and/or improve existing technologies for the detection and evaluation of chemical and biological carcinogens in ...

10. [Technologies and Software to Support Integrative Cancer Biology Research](#)

Release Date: 05-19-2009Open Date: 07-05-2009Due Date: 05-08-2012Close Date: 05-08-2012

Purpose The goal of this Funding Opportunity Announcement (FOA) is to support the development as commercial products of software, computational/mathematical methods, and laboratory technologies that will facilitate, accelerate, and/or enhance integrative cancer biology research. This FOA encourages Small Business Innovation Research (SBIR) grant applications from small business concerns (SBCs) t ...
